CAREER OBJECTIVE

Motivated Computer Science graduate with hands-on experience in building responsive web applications using React.js, JavaScript, HTML, CSS, Tailwind CSS, and REST APIs. Passionate about developing scalable, user-friendly web applications and eager to contribute as a Front-End/Web Developer.

EDUCATION

B. Sc Computer Science (2023–2026)

Bishop Heber College (Autonomous), Tiruchirappalli

CGPA: 7.0

Higher Secondary

Bishop Heber Higher Secondary School

72%

TECHNICAL SKILLS

Frontend

- React.js
- JavaScript (ES6+)
- HTML5
- CSS3
- Tailwind CSS

Tools

- Git
- GitHub
- Vercel

Web

- REST API Integration
- Responsive Web Design

SOFT SKILLS

- Problem Solving
- Communication
- Teamwork
- Adaptability
- Time Management

PROJECTS

NovaAuth – Authentication Web Application

React.js • Express.js • JavaScript • Tailwind CSS

- Developed a responsive authentication web application using **React.js** and **Express.js**.
- Implemented client-side form validation to verify user inputs before sending authentication requests.
- Used **POST** requests to verify user credentials through the Express backend.

- Redirected authenticated users to the dashboard and displayed error messages for invalid credentials.

[View Project](#)

SkyCast – Weather Application

React • Tailwind CSS • Axios • Weather API

- Built a responsive weather application using **React.js** and reusable components.
- Integrated **REST API** using Axios to display real-time weather information.
- Implemented loading, error handling and dynamic UI updates.
- Deployed application using Vercel.

[View Project](#)

Favorite Students

React • Context API

- Developed a React application using **Context API** for global state management.
- Prevented duplicate favorite entries through validation logic.
- Designed a responsive interface for desktop and mobile devices.

[View Project](#)

Nostra – E-commerce Website

HTML • Tailwind CSS • JavaScript

- Built a responsive e-commerce website using HTML, Tailwind CSS and JavaScript.
- Implemented dynamic product search functionality.
- Built interactive navigation and mobile-friendly interface.
- Focused on clean UI and user experience.
